Honors Convocation 2023

September 30, 2023
10:00 a.m. to 11:30 a.m.
Student Union Memorial Center
Welcome and Presentation of Awards
Rebecca Gomez, PhD
Associate Dean for Undergraduate Student Success

Keynote Speaker
Brenda Frye, PhD
Associate Professor, Department of Astronomy
Associate Astronomer, Steward Observatory

Professor Brenda Frye is endeavoring to understand how galaxies first formed and evolved over cosmic time into the massive objects that we see today such as the Milky Way with its billions of stars and at least one example of intelligent life, humans. She makes use of gravitational lenses in distant space, which act much like eyeglass lenses, to bring into focus these otherwise too faint and distant galaxies. Prof. Frye earned her Ph. D. at the University of California at Berkeley and held two postdoctoral fellowships at Princeton University before taking on faculty positions in Ireland and in San Francisco. She is now a professor here at the University of Arizona, her Alma Mater. This career path all started here at the University of Arizona, where she graduated with dual physics and astronomy B. A. degrees earned through the Honors Program.

Student Speaker
Aunita Hakimi
Bioinformatics
Highest Academic Distinction

Aunita Hakimi, an honors junior at the EEB department, is pursuing a major in Bioinformatics with a minor in Chemistry from the CBC department. Originally from Iran, Aunita relocated to Arizona in August 2021. From her first semester, she immersed herself in cancer research, initially in a bioinorganic lab within the CBC department, and currently in an MCB lab. Passionate about student success, Aunita actively guides her peers to resources that enable them to follow their passions. She champions academic achievement, mentors younger students, serves as a Global Ambassador for the international student community, and supports her peers as a College of Science ambassador. Having devoted a gap year after high school in Iran to learning English, Aunita developed a fascination for writing in the language. She has since authored various pieces and a collection of poetry in English in her free time. Intrigued by the intersection of human nature and the role of technology in the life sciences, Aunita aspires to merge medicine and technology in her future endeavors.
