Program

Welcome

Elliott C. Cheu

Interim Dean

Presentation of Awards

Rebecca L. Gomez

Interim Associate Dean, Student Academic Success

Keynote Address

Laura Stein, PhD

Assistant Professor, University of Oklahoma

Outstanding Senior, Spring 2009

College of Science Spring 2020 Outstanding Senior Address

Brandon Garivaldo

Speech, Language, and Hearing Sciences

Presentation of Graduates

Rebecca Gomez

Interim Associate Dean, Student Academic Success

College of Science Fall Outstanding Senior Address

Mila Ann Lubeck

Geosciences

Dr. Laura R. Stein is an Assistant Professor in the Department of Biology at University of Oklahoma. Her research broadly spans the interface between animal behavior and the role of plasticity in evolution. In particular, she is interested in causes and consequences of behavioral plasticity within and across generations, their influence on evolutionary patterns, and the underlying processes by which organisms integrate information from their genes, parents, and personal experience. While primarily using fishes to address these questions, her students have worked with animals ranging from snakes to spiders.

Prior to her appointment as a faculty member at Oklahoma, Dr. Stein was a National Science Foundation postdoctoral fellow at Colorado State University, working on genetic mechanisms underlying behavioral divergence in Trinidadian guppies. Dr. Stein earned her Ph.D. in Ecology, Ethology, and Evolution from University of Illinois Urbana-Champaign in 2015 and her B.S. in Ecology and Evolutionary Biology from University of Arizona in 2009.

Brandon Garivaldo is a first generation, graduate student of color in the department of Speech, Language and Hearing Sciences (SLHS). In his undergraduate career, he participated in research endeavors that focused on the misdiagnosis and/or underdiagnosis of Spanish-English speaking children in Southern Arizona. This experience influenced him to obtain his Bachelor of Arts in Spanish linguistics to help support his future research career in this field. Brandon also served as president (2019-2020) and was one of the founders of Speech-Language and Hearing Cats of Color. This club he and his friends created was made to advocate for underrepresented students. In this experience, he learned more about advocacy work and what it means to fight for diversity, equity, and inclusion in higher education.

Currently, Brandon is a graduate student in the Masters of speech-language pathology in the department of SLHS. He hopes to get the clinical background he needs in order to pursue a future research career serving underrepresented and underserved populations. Ultimately, he would like to obtain his PhD in Speech, Language, and Hearing Sciences and continue you working as a researcher and academic in higher education. His ultimate goal is to continue his work in better serving

Mila Lubeck is an undergraduate student of color in the department of Geosciences and completed her Bachelor of Science degree in Geosciences with a Geophysics emphasis and a minor in Mathematics. During her undergraduate career, she has excelled in her research to investigate the projected ice mass loss of Greenland and the future rate of solid Earth deformation. Her research is a step towards closing the gap of understanding how anthropogenic impacts on the globe affect polar regions. As a part of the undergraduate career she was involved in the Society of Earth Science Students, Association for Women Geoscientists, and Chi Omega women's fraternity. Ms. Lubeck was involved within the Tucson community by helping with the Tucson Gem and Mineral Show each year at the Junior Education area and with the Make A Wish Foundation through the Chi Omega women's fraternity. These experiences have shaped her into the driven woman of color she is today and allowed her to cultivate an interest in forging a path of diversity and inclusion as she furthers her career and community impact.

Currently, Ms. Lubeck is looking forward to beginning a Ph.D. program Fall 2021 where she is able to continue research within the Earth sciences. By extension, she plans on being actively involved in graduate school committees and organizations that promote inclusion and diversity within the future department and community. As she continues in her career, she would like to extend the bridge between the climate sciences and the public to help others understand anthropogenic impacts. Ultimately, Ms. Lubeck desires to facilitate and lead research that can open new interdisciplinary subfields that will positively impact the scientific community.

Welcome

College of Science Graduates:

On behalf of the University of Arizona College of Science, I would like to begin by congratulating the college graduates of 2020. It has been an extraordinary year with unprecedented challenges that makes your achievements even more impressive. Your class had to pivot within days to understand how to learn, excel, and meet your degree's challenges during a Global Pandemic. At the University of Arizona, we take great pride in your accomplishments and your vigorous pursuit of new knowledge now more than ever. We hope that you will continue your proven success as you start on your new journey. Your academic contributions, desire to learn, and dedication to sharing your knowledge and research have been invaluable to the College of Science. We are grateful for the legacy you are leaving behind.

This is an incredible time for science, and you are all fortunate to be a part of it. As future world leaders, I encourage you to fully embrace the opportunities science presents. Just as science has been the cornerstone of numerous significant advances in the past, it is fundamental to solving the numerous challenges of today and tomorrow. Scientists are needed more than ever. Your success at the University of Arizona demonstrates your ability to do such work, and I am encouraged that you will strive to achieve the unimaginable. Challenges today are multidimensional and require varied points of view and expertise. So, no matter which of the College of Science degrees you have received, given the world's many complex problems, your education has prepared you to contribute to innovative solutions right away. As you celebrate today you have the opportunity—and challenge—in taking part in this scientific revolution. This responsibility includes performing your work with great integrity and humanity. No one can take away your education, and I hope you view your hard-earned education as an opportunity to give back.

My congratulations to each one of you. As scientists, I urge you to continue to explore and understand the amazing world in which we live; Always question, always wonder.

Elliott C. Cheu

Interim Dean of the College of Science
Distinguished Professor of Physics

Spring 2020 Awards

Outstanding Senior Awards

This award is given in recognition of academic excellence, independent research, and community involvement.

Overall College of Science Outstanding Senior

Brandon Garivaldo

Speech, Language, and Hearing Sciences

The University of Arizona sits on the original homelands of indigenous peoples who have stewarded this land since time immemorial. Aligning with the university's core value of a diverse and inclusive community, it is an institutional responsibility to recognize and acknowledge the people, culture and history that make up the Wildcat community. At the institutional level, it is important to be proactive in broadening awareness throughout campus to ensure our students feel represented and valued.
